

The BPFC037 Series is a kind of 2-cores anchor clamp, it is used to fix the end of inside line, also suitable for insulated LV-ABC cable and multiple conductors. The body is made of high-quality materials of high tensile strength and resistance to environmental effects and UV radiation. No additional tools required.

Standard: NFC33-042

**Mechanical Dimension (mm)**

| Model     | Cross section(mm <sup>2</sup> ) | Messenger DIA. (mm) | Breaking load(kN) |
|-----------|---------------------------------|---------------------|-------------------|
| BPFC037-1 | 2 × (16-25)                     | 4-8                 | 2                 |
| BPFC037-2 | 2 × (16-25)                     | 4-8                 | 2                 |
| BPFC037-3 | 2 × (16-25)                     | 6-10                | 2.5               |
